May 14, 2024 - In performing the 2024 - Forest County - "PLSS Corner Remonumentation and GPS Services" project, I found a 2.25"diameter galvanized iron pipe with a 3" diameter stamped brass cap. The monument is in a Red Pine grove, and extends ±14" above grade. I also found 2 of Resvick's bearing trees and 2 of Cochrane's bearing trees alive and in good condition. I set nails in the existing reference monuments and made new measurements as shown below.

Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (d), above. Show the distances between the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 2 of the witness monuments shown on the drawing in (d), above.

See Drawing Below.

was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location?

Restored through acceptance of a found perpetuated location.

(g&h) Was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?

William B. Cochrane (type or print name) certify that the corner location shown on this record was determined by me or under my direction and control and that this U.S. Public Land Survey Monument Record is correct and complete to the best of my knowledge and belief.
