U.S. PUBLIC LAND SURVEY MONUMENT RECORD

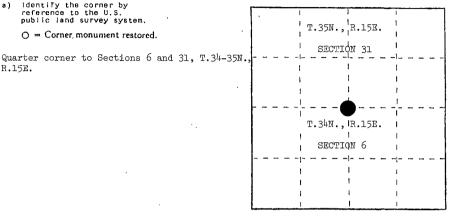

INSTRUCTIONS:

This record shall show the location of the corner and shall include all of the following nine elements (a through i).

(a) Identify the corner by reference to the U.S. public land survey system.

R.15E.

O = Corner, monument restored.

Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

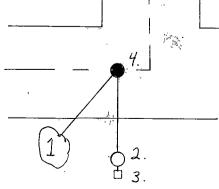

Corner found marked by iron pipe in centerline intersection of town roads--referenced by a county monument 24.20 feet south. Placed a $2" \times 36"$ aluminum monument 6" below road surface.

(c) with the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.)

Describe witness monuments.

- (d) Show a plan view drawing depicting the relevant monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north. Indicate north.
 - 1. Elm, 14", S.39°W., 23.90 feet
 - 2. Reference Corner, South, 24.20 feet
 - 3. Steel Sign Post, South, 24.90 feet
 - 4. 2" x 36" aluminum monument 6" below road surface

Ĕ.

REGISTER'S OFFICE) Forest County, Wis.)

A-3

(e) Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (d), above. Show the distances between the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 2 of the vitness monuments shown on the drawing in (d), above.

(f) Was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location?

Found perpetuated position.

(g&h) Was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?

Milo E. Stefan

(Lype or print name) certify that the corner location shown on this record was determined by me or under my direction and control and that this U.S. Public Land Survey Monument Record is correct and complete to the best of my knowledge and belief.

INDEX No. ___ A-7

U. S. PUBLIC LAND SURVEY MONUMENT RECORD.

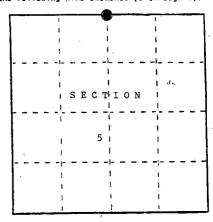

INSTRUCTIONS:

This record shall show the location of the corner and shall include all of the following nine elements (a through I).

Identify the corner by reference to the U.S. public land survey system.

O = Corner monument restored.

Quarter Corner Common to Sections 5 and 32, T34-35N, R15E, Forest County, Wisconsin.

REGISTER'S OFFICE Forest County, Wis.

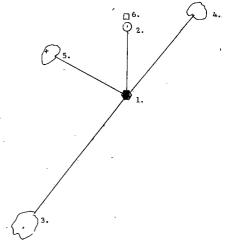

Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

In 1957, A. Curtis set a wood post for the corner and the following corner references: . 11" Sugar N70°E 24 1ks. 12" S25°W Sugar 25 1ks.

In 1908, J. Melendy recovered iron gas pipe set by N. H. Smith. He marked the following corner references: chiseled an "X" on stone $4^{1}X4^{1}$ N45 $1/2^{\circ}E$ 49 3/4 lks. chiseled an "X" on stone 3'X4' N60°40'W 61 1/3 1ks.

In 1988, Schulke recovered the boulder to the Northwest. Restored the corner from the boulder reference. Placed an iron pipe 6 inches below the surface of the road.

- in the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural scone, iron or other equally durable material.) Describe witness monuments.
- Show a plan view drawing depicting the relevant monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north.
 - Set 1 1/4" X 2" Iron pipe
 - Set witness corner 2 1/2" X 36" aluminum magnetic cap monument stamped to identify the location of the corner North 32.9 ft.
- 7!1 S37°W .. Sugar Maple 78.20 ft. 5" 4.
 - Sugar Maple N39°E 48.66 ft.
- "X" on Boulder 3'X4' N61°W 5. 40.59 ft.
- Steel sign post North of the Witness Corner 6. Monument 2.6 ft.

(e) Doscribe any material discrepancy between the location of the corner as restored or reastablished and the location of that corner as previously restored or reastablished by distance and direction. Show the discrepancy on the plan view drawing under (d); above. Show the distances between the corner as previously restored or reastablished and (1) the corner as restored or reastablished, and (2) to at least 2 of the vitness monuments shown on the drawing in (d), above.

No discrepancy, first corner restoration.

- (f) Was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location?
 - (2) found perpetuated location Recovered bearing rock.
- (gkh) Was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?

U.S. PUBLIC LAND SURVEY MONUMENT RECORD

Note: This form is intended an designed to fulfill all requirements of Wisconsin Administrative Code. Chapter A-E 7.08 U.S. Public Land Survey Monument Record (3)(a)(b)(c)(d)(e)(f)(g)(h)(i). An additional sheet may be added to if necessary to conform with said requirements.

(a) Corner Location: Township 34 North Range 15 East

Town of Wabeno

Forest County, Wisconsin

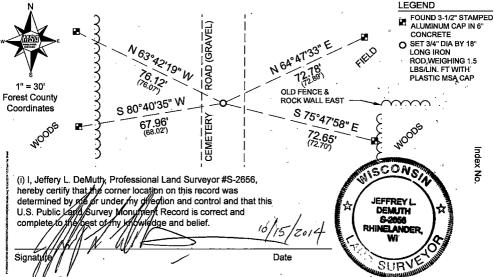

(b)(f)(g)(h) Description of monument found at this corner and if it was accepted, state all evidence (material, testimonial, occupational, plats, records, other monuments) used as a basis for accepting. If not accepted or if nothing was found, state evidence used as basis for establishing location. If reestablishment through lost corner proportionate methods, indicate all monuments, distances and directions used to establish. Indicate type of monument found or set and sign post.

March 1857 - Artemis Curtis set post common to corners 4 & 5; T34N, R15E and 32 & 33; T35N, R15E

Sugar Maple 12" - N67°W 47 links
Sugar Maple 10" - N56°E 41 links
Yellow Birch 11" - S33°W 17 links
Elm - S64°E 18 links

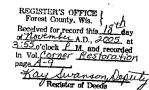

- 1908 J. Melendy found post of unknown origin. Replaced with 5"x5" elm post in stones. Found original elm BT, other trees gone. Set additional elm post as reference 2 rods East.
- 1988 Alan Harrison subdivided section 4 for a USFS boundary survey. Position falls in centerline of road, didn't find post. Set 1-1/2" dia iron pipe at accepted corner position.
- 2005 Zachary Stevens found 60d nail in centerline of road. Replaced with a 1" dia iron pipe with cap.
- 2006 Zachary Stevens found 1" dia iron pipe and created new reference ties with WisDOT monuments.
- 2014 I found no corner near the centerline of Cemetery Road. I set a 3/4" dia by 18" long iron rod 6" below gravel surface from Zachary Stevens ties and show my best-fit measurements below.

(c)(d)(e) Plan view of corner with ties to at least 4 witness monuments. If in disagreement with previously established corner, show the distances between the two corners and also indicate the ties to the disputed corner.

U. S. PUBLIC LAND SURVEY MONUMENT RECORD

INSTRUCTIONS:

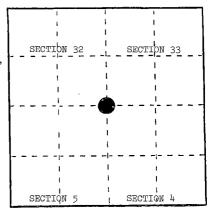

This record shall show the location of the corner and shall include all of the following nine elements (a through 1).

(a) Identify the corner by reference to the U.S. . public land survey system.

O = Corner monument restored.

Corner common to Sections 4-5-32-33, T.34-35N., R.15E., Forest County, Wisconsin.

REGISTER'S OFFICE Forest County, Wis. Received for record this... fune A. D., 1980 at 5. o'clock...A. recorded in Vol CORNER RESTORATIONS on page A . 9

(b) Describe any record evidence, monument evidence, occupational evidence, testimonial evidence any other material evidence you considered, and whether the monument was found or placed. testimonial evidence or

In 1857, A. Curtis set wood post for section corner and made the following BTs: Sugar, 12", N.67°W., 47 links; Sugar, 10", N.56°E., 41 links; Yellow Birch, 11", S.33°W., 17 links; Elm, size unknown, S.64°E., 18 links.

In May, 1908, J. Melendy found post by someone, set new Elm post, 5" x 5", in stones, original Elm, S.64°E., 17 links, other bearings blown out of road. Set Elm post, 5" x 5", 2 rods east.

In April, 1988, Alan Harrison found fence line east and road centerlines running to north, south, and west. Set point and traversed to $\frac{1}{4}$ corner south, $\frac{1}{2}$ mile. Distance south is 7.5' short. Landowner to the northeast remembers post in old road at location of traverse station set and iron pipe on east side of road. Could not locate iron pipe on road edge. Position of traverse station accepted as best corner location and set iron pipe to mark corner location.

(c) In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.) Describe witness monuments.

(d) Show a plan view drawing depicting the relevant monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north.

 $1\frac{1}{2}$ " x 30" iron pipe, 6"± below road surface.

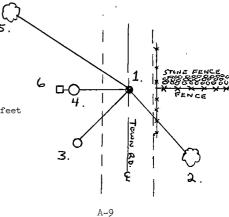

Sugar, 10", S.38°E., 43.23 feet 2.

3.

Power Pole #3 1 15-5E30, 8. 1 7°W., 36.14 feet Witness Corner Monument, 2 2" x 36", West, 33.00 feet 4.

Sugar, 9", N.52°W., 76.08 feet 5.

Steel Sign Post, West, 34.15 feet

(e) Describe any material discrepancy between the location of the corner as restored or reastablished and the location of that corner as previously restored or reastablished by distance and direction. Show the discrepancy on the plan view drawing under (d), above. Show the distances between the corner os previously restored or reastablished and (1) the corner as restored or reastablished, and (2) to at least 2 of the witness monuments shown on the drawing in (d), above.

Distance south to East 4 corner, Section 5, by Melendy was 2329.14'. Measure by Forest Service is 2321.59'.

- (f) Was the corner restored through acceptance of (1) an obliterated evidence flocation, or, (2) a found perpetuated location?
- (1) an obliterated evidence location.
- (gkh) was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?

No.

U. S. PUBLIC LAND SURVEY MONUMENT RECORD.

INSTRUCTIONS:

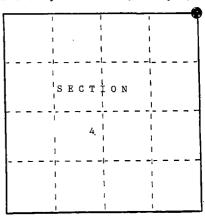

This record shall show the location of the corner and shall include all of the following nine elements (a through I).

(a) identify the corner by reference to the U.S. public land survey system.

O - Corner monument restored.

Section Corner Common to Sections 3, 4, 33 and 34, T34-35N, R15E, Forest County, Wisconsin.

> REGISTER'S OFFICE | QJL rorest county, Wis. (QTL
> Received for record this..., day
> of Meanury A.D., 19.8.9. at
> 150.0°clock P.M. and recorded
> In Vol. CORNER RESTORATIONS
> page 4-13
> factor Machine Machine
> January Hischen Meanury Register of Deeds

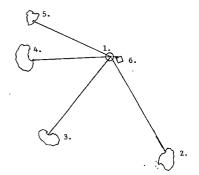

(b) Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

In 1957, A. Curtis set a wood post for the corner and the following corner references: 18" N42°W 16" S40°E 55 lks. Sugar Maple 18" Sugar Maple N67°E 18 1ks. Sugar Maple 29 1ks. 16" S64°W Sugar Maple 28 1ks.

In Oct. 1910, N. H. Smith recovered the stumps and where a wood post stood. Set a wood post for the corner and the following corner references: N81 1/4°E 7" N49 3/4°W 24 1ks. Basswood

In 1988, Schulke found a 16" dia. Elm tree and no other evidence found due to heavy bulldozing in the area for the road. Placed a 2 1/2" X 36" aluminum monument 0.6 ft. below the surface of a two track.

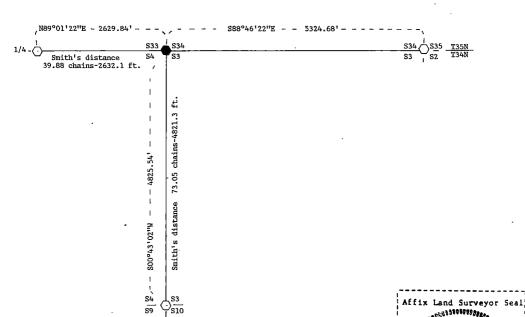

- (c) In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.) Describe witness monuments.
- (d) Show a plan view drawing depicting the relevant monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north.
- 2 1/2" X 36" aluminum magnetic cap monument stamped to identify the corner. Sugar Maple 6" S46°E
- 2. Sugar Maple 3. Hickory
 - 53.28 ft. 10" S39°W 51.63 ft. 7" S87°W 42.18 ft.
- 4. White Ash 5. Sugar Maple 5" N65°W 44.05 ft.
- 6. Steel sign post 6.4 ft. East

(e) Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reastablished by distance and direction. Show the discrepancy on the plan view drawing under (d), above. Show the distances between the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 2 of the vitness monuments shown on the drawing in (d), above.

No discrepancy, first corner restoration.

- (f) Was the corner restored through acceptance of (1) an oblitérated evidence location, or, (2) a found perpetuated location?
 - (1) an obliterated evidence location. Found what appears to be Smith's bearing tree which places the corner close to Smith's distances from the North 1/4 corner and the Southeast corner of Section 4.
- (gkh) was the corner reastablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?

(1) I, John C. Schulke
(type or print name) certify that the corner location shown
on this record was determined by me or under my direction and
control and that this U.S. Public Land Survey Monument Record is
correct and complete to the best of my knowledge and belief.

PUBLIC LAND SURVEY MONUMENT RECORD

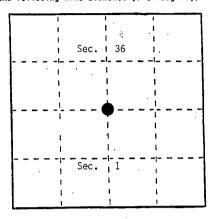

INSTRUCTIONS:

This record shall show the location of the corner and shall include all of the following nine elements (a through i).

(a) Identify the corner by reference to the U.S. public land survey system.

Corner monument restored.

Quarter corner to Sections 1 and 36, T.34-35N.,R.15E., Forest County, Wisconsin

Forest County. Wis.

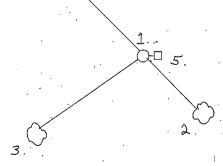

Received for record this. O. day of Steph ... A.D., 19.87 at 10.35.0 dock A.M. and recorded in Vol. Corner. RESTORATIONS page 4.23 Asolenh Register of Deeds

(b) Describe any record evidence, monument evidence, occupational evidence, teatimonial evidence or any other material evidence you considered, and whether the monument was found or placed. In 1857 Artemas Curtis, set wood post with the following B.T.'s; Sugar, 26", N22W., 24 links; Hemlock, 12", S39E, 13 links.

In 1988, Al Harrison, searched for corner and could find no evidence of corner or accessories.

- In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.)

 Describe witness monuments. (c)
- (d) Show a plan view drawing depicting the relevant monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north.
- 1. 2날" X 36" Aluminum monument with tablet stamped to identify the corner.
- 2.
- Sugar, 8", S49E, 24.27 feet Sugar, 7", S61W, 59.53 feet Sugar, 6", N52W, 48.45 feet 3.
- Steel Sign Post, East, 1.77 feet 5.

Describe any material discrepancy between the location of the corner as restored or restablished and the location of that corner as previously restored or restablished by distance and direction. Show the discrepancy on the plan view drawing under (d), above. Show the distances between the corner as previously restored or restablished and (1) the corner as restored or restablished, and (2) to at least 2 of the vitness monuments shown on the drawing in (d), above.

None.

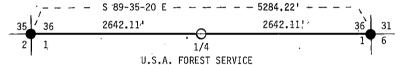

Was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location?

An obliterated evidence location

(gkh) was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?

Yes, corner established midpoint and on line between Section corner ½ mile East and ½ mile West.

C-9 INDEX No.

U. S. PUBLIC LAND SURVEY MONUMENT RECORD

INSTRUCTIONS:

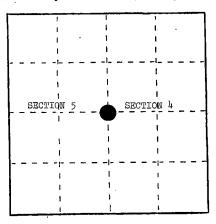

This record shall show the location of the corner and shall include all of the following nine elements (a through I).

(a) Identify the corner by reference to the U.S. public land survey system.

O = Corner monument restored.

Quarter corner common to Sections 4 and 5, T.34N., R.15E., Forest County, Wisconsin.

REGISTER'S OFFICE Forest County, Wis. 19 The Received for record this.

Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

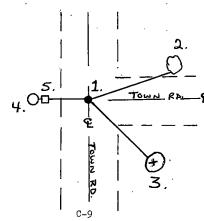

In 1859, J. McBride set $\frac{1}{4}$ post and made the following BTs: Elm, 7", S.37°E., 8 links; Sugar, 7", S.6°W., 26 links.

In May, 1908, J. Melendy found old post and set a new Elm post, $5" \times 5"$. Found Elm (stump), $8.37\frac{1}{2}^{\circ}E$., $7\frac{1}{2}$ links; Maple (stump), $8.59^{\circ}W$., $25\frac{1}{2}$ links. Marked new BTs. Placed "X" on stone, $2\frac{1}{2}$ " x 3', $8.84^{\circ}10^{\circ}W$., $22\frac{1}{2}$ links; "X" on stone, $2' \times 2'$, $8.45\frac{1}{2}^{\circ}E$., $67\frac{1}{4}$ links.

In December, 1987, found intersection of north-south-east roads and set traverse point. At S.45°E., 44.40', found 2' x 2' stone with "X" chiseled onto top. Accepted position as a perpetuation by J. Melendy of the original corner location. Set iron pipe to mark corner location.

- In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.)

 Describe witness monuments.
- Show a plan view drawing depicting the relevant monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north.
- 12" x 30" iron pipe, 5"± below road surface.
- Basswood, 9", N.77°E., 56.12 feet
 "X" on stone, 2' x 2', S.45°E., 44.41 feet 3.
- Witness Corner Monument, 2½" x 36", West, 33.00 feet
- Steel Sign Post, West, 32.13 feet

(e) Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reastablished by distance and direction. Show the discrepancy on the plan view drawing under (d), above. Show the discances between the corner as previously restored or reastablished and (1) the corner as restored or reastablished, and (2) to at least 2 of the witness monuments shown on the drawing in (d), above.

None.

- [f] was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location?
- (2) a found perpetuated location.

(19kh) was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?

No.

(1) Alan D. Harrison
[type or print name] certify that the corner location shown
on this record was determined by me or under my direction and
control and that this U.S. Public Land Survey Monument Record is
correct and complete to the best of my knowledge and boilef.

INSTRUCTIONS:

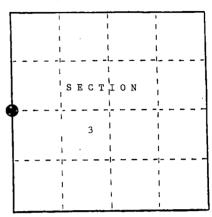

This record shall show the location of the corner and shall include all of the following nine elements (a through I).

identify the corner by reference to the U.S. public land survey system.

O = Corner monument restored.

Quarter Corner Common to Sections 3 and 4 T34N, R15E, Forest County, Wisconsin.

> REGISTER'S OFFICE Forest County, Wis. Reflyed for record this go day of December A.D., 1990 at 250 clock P. M. and recorded in Vol CRNFR RESIGNATION OF THE PARTY OF T and recorded
> RESTORATIONS

Describe any record evidence, monument evidence, occupational evidence, teatimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

In 1959, J. McBride set a wood post for the corner and the following corner references: Basswood Sugar

24" 14"

N23°W N56°E

12 1ks. 24 1ks.

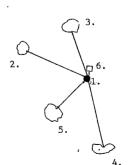

In Oct. 1910, N. H. Smith found no evidence. Set a wood post for the corner and the following corner references: Elm 12'' S64 $3/4^{\circ}E$ 85 1/2 lks. . 12" 6" E1m N37°35'W 63 1/2 1ks.

In 1988, Found no evidence.

Placed a 2 1/2" X 36" aluminum monument.

- In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.)

 Describe witness monuments. (0)
- Show a plan view drawing depicting the relevant monuments and reference ties f.d 1 which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. indicate north.
- 1. 2 1/2" X 36" aluminum magnetic cap monument
- stamped to identify the corner. Sugar Maple 5" N67°W
- 34.50 ft. 4" N20°W 3. Sugar Maple 26.16 ft.
- 5" 4. Red Maple S13°E 34.54 ft.
- 3" S44°W 5. Sugar Maple 23.28 ft. 6. Steel sign post North 1.0 ft.

(e) Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (d), above. Show the distances between the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 2 of the vitness monuments shown on the drawing in (d), above.

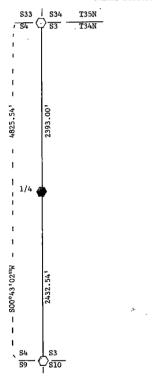

No discrepancy, first corner restoration.

(f) Was the corner restored through acceptance of {1} an obliterated evidence location, or, (2) a found perpetuated location?

No, see g and h.

(gkh) was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?

Corner restored by proportionate methods.

U. S. PUBLIC LAND SURVEY MONUMENT RECORD

INSTRUCTIONS:

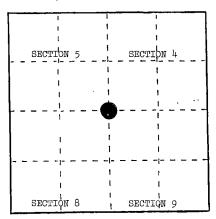

This record shall show the location of the corner and shall include all of the following nine elements (a through I).

(a) Identify the corner by reference to the U.S. public land survey system.

O = Corner monument restored.

Corner common to Sections 4-5-8-9, T.34N., R.15E., Forest County, Wisconsin.

REGISTER'S OFFICE Forest County, Wis. } Received for record this.... 8.45 O'clock A. M. and recorded in VolCORNER RESTORATIONS on page Fig. 1 A. D., 1999 at

Describe any record evidence, monument evidence, occupational evidence, teatimonial evidence or any other material evidence you considered, and whather the monument was found or placed.

In 1859, J. McBride set wood post for corner and made the following BTs: Elm, 24", N.46°W., 25 links; Elm, 14", N.78°E., 38 links; Sugar, 10", S.7°E., 11 links; Sugar, 8", S.72°W., 39 links.

May, 1905, N. H. Smith found stake for corner.

May, 1908, J. Melendy found Hemlock post by N. Smith. Set new Cedar post, $3\frac{1}{2}$ " x $3\frac{1}{2}$ " in stones. Fence post at fence corner, N.35 $\frac{1}{2}$ °E., $\frac{1}{2}$ 4 links.

April, 1988, Alan Harrison set traverse point at intersections of road centerlines east-north-west. Old fence lines and original evidence has been dozed out. Distance north falls 3.85' long of Melendy's. Position accepted as best evidence of corner location and monumented as such.

In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.)

Describe witness monuments.

Show a plan view drawing depicting the relevant monuments and reference ties monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north.

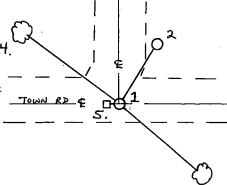

2½" x 36" aluminum monument in mound of rock 1. stamped to identify the corner.

Power Pole #3415-9W10, N.23°E., 29.85 feet 2.

Aspen, 6", S.43°E., 53.89 feet Basswood, 6", N.52°W., 65.10 feet 3.

4.

Steel Sign Post, West, 1.20 feet

E-9

Describe any material discrepancy between the location of the corner as restored or restabilished and the location of that corner as previously restored or restabilished to distance and direction. Show the discrepancy on the plan view drawing under (d), above. Show the distances between the corner as previously restored or restabilished and (1) the corner as restored or restabilished, and (2) to at least 2 of the vitness monuments shown on the drawing in (d), above.

Distance north to East $\frac{1}{4}$ corner, Section 5, by Melendy was 2560.80'. Measure by Forest Service is 2564.65'.

- (f) Was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location?
- (1) an obliterated evidence location.

(g&h) was the corner reestablished through lost corner proportionate methods? If so, show the mathod, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?

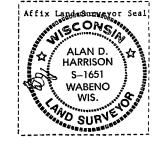

No.

Rangor Certificate ready for filing

DOCUMENT NUMBER 136611

U. S. PUBLIC LAND SURVEY MONUMENT RECORD.

INSTRUCTIONS:

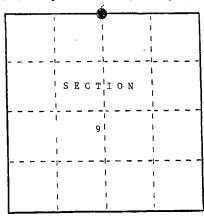

This record shall show the location of the corner and shall include all of the following nine elements (a through i).

(a) identify the corner by reference to the U.S. public land survey system.

O = Corner monument restored.

Quarter corner common to Sections 4 and 9, T34N, R15E, Forest County, Wisconsin.

REGISTER'S OFFICE Forest County, Wis. 14 II. Required for record this 30 day of Licimum Land. 190 at at 3.50 color M. and recorded in Vol. CRISK RESTORATIONS page 5.1 Hechanism

(b) Describe any record evidence, monument evidence, occupational evidence, teatimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

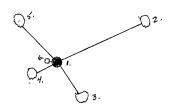

In 1969, Jean Resvick found a squared Cedar post with scribing on it and found 16" Hemlock tree with BT scribing at the base of the tree. Replaced post with 2" inside dia. galvanized iron pipe with brass tablet stamped to identify the corner. The following corner references: Basswood 7" N29°E 4.95 ft. Maple 6" S57°W 13.27 ft. Yellow Birch 6" N49°W 26.31 ft. Square Cedar post North 1.4 ft.

In 1988, John Schulke found corner as described on the Corner Certificate Document #96934 done by Resvick. Found the following corner references: Sugar Maple 10" S61°W 13.32 ft.
Yellow Birch 6" N44°W 26.41 ft. Decayed Basswood 12" N24°E 4.89 ft. Wood post North 1.4 ft.

- In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.)

 Describe witness monuments. 101
- (d) Show a plan view drawing depicting the relevant monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north,
 - 1. 2" inside dia. galvanized iron pipe with a brass tablet stamped to identify the corner.

 - Twin Sugar Maple 11" N65°E 45.76 feet
 Sugar Maple 5" S34°E 20.06 feet
 - 5" S34°E 20.06 feet 10" S61°W 13.32 feet 4. Sugar Maple
 - 6" N44°W 26.41 feet 5. Yellow Birch
 - 6. Steel sign post West 2.1 feet

(e) Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (d), above. Show the distances between the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 2 of the vitness monuments shown on the drawing in (d), above.

No discrepancy

- (f) Was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location?
- (2) found perpetuated location.

(gkh) was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?

JOHN C. SCHULKE S-1665 LUDINGTON MI

(1) I. John Schulke

Township 34 North , Range 15 East /, Section 4

PUBLIC LAND SURVEY MONUMENT RECORD U.

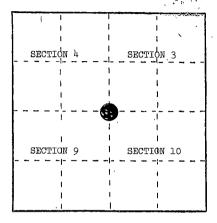

INSTRUCTIONS:

This record shall show the location of the corner and shall include all of the following nine elements (a through !).

identify the corner by reference to the U.S. public lend survey system.

O = Corner monument restored.

Section corner to Sections 3, 4, 9, and 10, T.34N., R.15E.

(b) Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

In June, 1859, James McBride set section post with the following BTs: Sugar, 16", N.14°W., 46 links; Elm, 9", N.57°E., 24 links; Linn, 20", S.25°E., 32 links; Elm, 10", S.71°W., 36 links.

October 15, 1910, N. H. Smith found 3 original BTs and made the following new BTs: Elm, 13", S.57½°W., 83 1/3 links; Sugar, 14", N.20°20'E., 90 1/3 links.

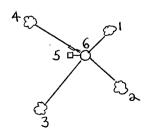

May 12, 1969, Jean Resvick chained east from # post to Sections 4 and 9, 40 chains, and found well point -- no stumps. Chained east from well point, 39 chains, and found old fence corner. At 80 chains found 2" x 2" post on south side of road.

June 20, 1984, Milo Stefan replaced well point with a 2" x 36" aluminum monument.

- In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.)

 Describe witness monuments.
- Show a plan view drawing depicting the relevant monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. (d) Indicate north.
- 1. Sugar, 6", N.25°E., 8.23'
 2. Sugar, 6", S.45°E., 12.74'
 3. Sugar, 4", S.24°W., 34.75'
 4. Sugar, 6", N.66°W., 35.43'

- Steel Sign Post, West, 1.3'
- 2" x 36" aluminum monument stamped to identify the corner.

Register of Deeds

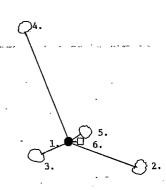

(b) Describe any record evidence, monument evidence, occupational evidence, teatimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

In 1959, J. McBride set a wood post for the corner and the following corner references: Sugar Maple 12" S53°E 24 lks.
Sugar Maple 18" N14°E 30 lks.

In 1988, Found no evidence in the area which has been heavily logged. Placed a 2 $1/2^{\circ}$ X 36° aluminum monument.

- (c) In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.) Describe witness monuments.
- (d) Show a plan view drawing depicting the relevant monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north.
- 2 1/2" X 36" aluminum magnetic cap monument stamped to identify the corner.
- 2. Sugar Maple 10" S69°E 25.16 ft.
- 3. Sugar Maple 5" S67°W 11.98 ft. 4. Sugar Maple 14" N21°W 39.71 ft.
- 5. Sugar Maple 6" N55°E 5.15 ft.
- 6. Steel sign post East 1.2 ft.

(e) Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (d), above. Show the distances between the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 2 of the vitness monuments shown on the drawing in (d), above.

No discrepancy, first corner restoration.

(f) Was the corner restored through acceptance of (%) an obliterated evidence location, or, (2) a found perpetuated location?

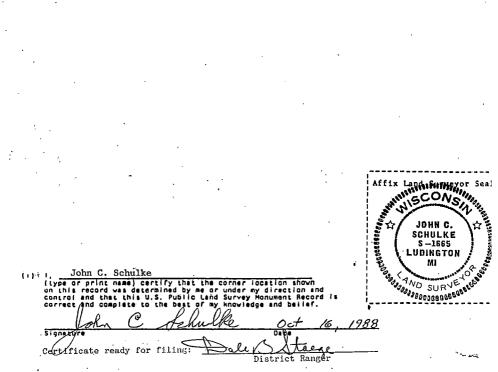

No, see g and h.

(gkh) was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?

Corner restored by proportionate methods.

INDEX No.

U. S. PUBLIC LAND SURVEY MONUMENT RECORD

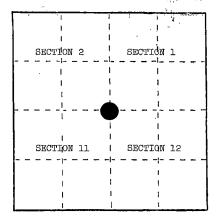

INSTRUCTIONS:

This record shall show the location of the corner and shall include all of the following nine elements (a through)),

(a) Identify the corner by reference to the U.S. public land survey system.

O = Corner monument restored.

Section corner to Sections 1, 2, 11, and 12, T.34N., R.15E.

(b) Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

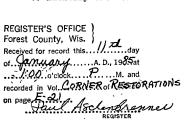

In June, 1859, James McBride set section post with the following BTs: Sugar, 10", N.54°W., 20 links; Sugar, 12", N.20°E., 21 links; Hemlock, 30", S.56°E., 39 links; Elm, 12", S.55°W., 29 links.

June 20, 1984, Milo Stefan found $1_4^{\rm H}$ " x 36" iron pipe with both ends hand forged shut--round on top and pointed on the bottom. Pipe similar to Bay Shore Lumber Company pipes found in most evidence of original survey. Replaced iron pipe with a 2" x 36" aluminum monument.

- In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.)

 Describe witness monuments.
- (d) Show a plan view drawing depicting the relevant monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north.
- 1. Clump of Basswood, 8", N.47°E., 63.03' .
 2. Elm, 6", S.33°E., 27.99'
 3. Aspen, 6", S.30°W., 35.69'
 4. Hemlock, 24", N.76°W., 94.06'

- 5. Steel Sign Post, North, 1.3'
- 6. 2" x 36" aluminum monument stamped to identify the corner.

(a) Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (d), above. Show the distances between the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 2 of the witness monuments shown on the drawing in (d), above.

- (f) Was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location?
- (2) a found perpetuated location.
- (gkh) Was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?

No.

I. Milo E. Stefan
(type or print name) certify that the corner location shown
on this record was determined by me or under my direction and
control and that this U.S. Public Land Survey Monument Record is
correct and complete to the best of my knowledge and belief.

Mil C. Stepan

Affix Land Surveyor Seal

SUR

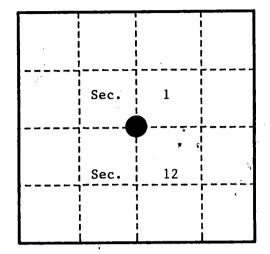

PUBLIC LAND SURVEY MONUMENT RECORD S. U.

INSTRUCTIONS:

This record shall show the location of the corner and shall include all of the following nine elements (a through 1).

identify the corner by reference to the U.S. public land survey system. O . Corner monument restored.

Quarter Corner Common to Sections 1 & 12, T.34N., R.15E., Foresty County, Wisconsin.

Describe any record evidence, monument evidence, occupational evidence, testimonial evidence any other material evidence you considered, and whether the monument was found or placed.

1858 - James McBride set wood posts and made following references: Birch, 30", N.21°W., 12 links; Sugar, 12", S.44°E., 16 links.

1922 - Nathan Smith found post by Bayshore and made new references: Sugar, 30", N.21°W., 40 links (26.40'); Sugar, 12", N.53°W., 12 links (7.92'); SUgar, 14", N.46°E., 11 links (7.62').

October 1984 - I found Smith's corner & references and conflicting evidence I believed to be original corner remains N.61°E., 55.4' from Smith's corner.

June 1992 - After careful re-evaluation of corner evidence and Nathan Smith's section subdivision of Section 12 in 1922, I accept Smith's perpetuation evidence as the best location of this corner. I believe the 1984 evidence I recorded as original was coincidental and not the original corner.

- in the pian view drawing below, provide reference ties to at léast 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (witness monuments shall be made of concrete, natural stone, iron orother equally durable material.)
- (d) Show a plan view drawing depicting the relevent monuments and reference which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north.
- 1. $2\frac{1}{2}$ " x 30" Aluminum Monument stamped to identify corner location.
- 2. Sugar, 8", N.18°E., 34.46 feet 3. Sugar, 9", S.12°W., 28.88 feet 4. Sugar, 8", N.89°W., 26.64 feet

CERTIFICATE READY FOR FILING:

S. PUBLIC LAND SURVEY MONUMENT RECORD IJ.

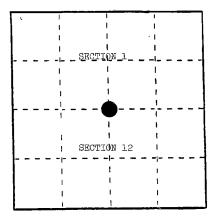

INSTRUCTIONS:

This record shall show the location of the corner and shall include all of the following nine elements (a through i).

(a) Identify the corner by reference to the U.S. public land survey system.

O = Corner monument restored.

Quarter corner to Sections 1 and 12, T.34N., R.15E.

(b) Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed. In 1858, James McBride set wood post with the following BTs: Birch, 30", N.21°W., 12 links; Sugar, 12", S.44°E., 16 links.

In 1922, N. Smith found post by Bay Shore--made the following BTs: Sugar, 30", N.21°W., 40 links; Sugar, 12", N.53°W., 12 links; Sugar, 14", N.46°E., 11 links.

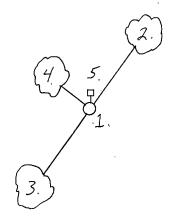

September, 1984, Neider found 29" Sugar with remains of location poster and DBH beaver blaze, from Sugar at S.50°W., 7.3', found post hole.

October 4, 1984, Alan Harrison found corner position, as found by Neider. Located Sugar stump, N.53°W., 7.92'. This is definitely N. Smith's corner. ENE of Smith's corner, 57', found the remains of a large Yellow Birch stump, 36"; at S.21°E., 7.9', a shallow 6"-8" post hole; at S.44°E., 10.6' from post hole, remains of Sugar stump with wood material visible.

- In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, netural stone, iron or other equally durable material.)

 Describe witness monuments.
- Show a pian view drawing depicting the relevant monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. indicate north.
- 2" x 30" aluminum monument stamped l. to identify the corner.
- 2.
- 3.
- Sugar, 5", N.33°E., 14.82' Sugar, 8", S.34°W., 13.24' Basswood, 7", N.49°W., 7.41' 4.
- Steel Sign Post, North, 2.58' 5.

REGISTER'S OFFICE) Forest County, Wis.) Received for record this 2 at day of January A. D., 1985at recorded in Vol GRNER. RESTORATIONS on page 5:23 Achembreanes

(e) Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (d), above. Show the distances between the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 2 of the witness monuments shown on the drawing in (d), above.

From original position, S.61°W., 55.4', to Bay Shore and Smith's corner.

*u ;

- (f) Was the corner restored through acceptance of {1} an obliterated evidence location, or, (2) a found perpetuated location?
- (1) an obliterated evidence location.
- (g&h) was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?

No.

U.S. PUBLIC LAND SURVEY MONUMENT RECORD

(As Required by WI Adm. Code)

History of original corner establishment and subsequent restorations and descriptions of any record, monument, occupational, testimonial or other evidence considered:

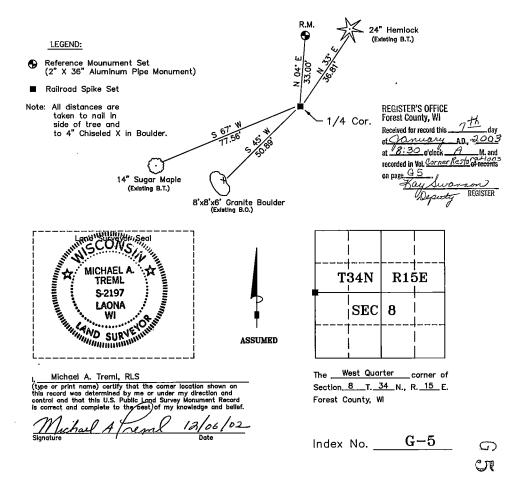

- 1859 James McBride, set original corner post and made the following B.T.'s: Elm, 10", S 41° E, 17 lks., 11.22 feet; Ironwood, 6", N 36° W, 24 lks., 15.84 feet.
- 1976 Paul Smith found a 2" iron pipe set by Public Service Survey for gas line. Said 2" iron pipe checked with plat corners on original Wabeno Plats. Set a Forest County Aluminum monument to mark the corner.
- 1982 Milo Stefan, U.S.F.S. Surveyor, found 1/4 corner marked by a Forest County Aluminum monument and made the following new bearing trees and bearing objects:

 Red Pine, 22", N 33' E, 36.81 feet
 Boulder, 4'x4'x3', S 35' E, 64.18 feet
 Sugar, 12", S 67' W, 77.56 feet
- 2002 I restored 1/4 corner from Stefan's bearing trees and one bearing object, The Forest County monument had been disturbed during road work. I drove a railroad spike in the asphalt surface for the 1/4 corner and set a 2" dia. aluminum reference monument.

(Check All That Apply)

- Restored through acceptance of an obliterated evidence location.
 Restored through acceptance of a found perpetuated location.
 Considered a lost corner and reestablished through lost corner proportionate methods (include a plan view drawing showing distances and directions to other Public Land Survey Corners used for proportioning and determining the corner location).
 Restored or reestablished in a location that differs from a previous restoration or reestablishment (include a plan view drawing and indicate what was set and/or found).

Describe the monument and accessories used to perpetuate the location of this corner (include a plan view drawing and indicate what was set and/or found).

	State of Wisconsin County of Forest Ss. I Paul N. Smith do hereby certify that on the 30th day of April 1976., I found evidence of the West 2 corner of Section 8 Township 34 North, Range 15 East Fourth Principal Meridian, as described hereon; and that from this evidence I established a new monument and accessories as described hereon to perpetuate the original

S. PUBLIC LAND SURVEY MONUMENT RECORD

INSTRUCTIONS:

This record shall show the location of the corner and shall include all of the following nine elements (a through I).

- (a) identify the corner by reference to the U.S. public land survey system.
 - O = Corner monument restored.

Quarter corner to Sections 11 and 12, T.34N., R.15E.

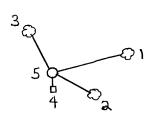

- (b) Oescribe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed. June-1859, James McBride set # section post with the following BTs: Hemlock, 10", N.50°E., 6 links; Birch, 18", N.44°W., 11 links. Nobember 8, 1922, N. H. Smith - stake in mound of stone and made new 14" Hemlock BT, 7832°E., 44% links. April 23, 1935, 874 by Robert Kolbe. He found hardwood post but no BTs. Placed location poster on west side of 10" Hemlock, 24. links. May 13, 1969, Resvick chained 40 chains from section corner to Sections 11, 12, 13, and 14, and found location poster on 17" Hemlock. Bulldozer has pushed pile from trail on site top at plantation post seen in rubble. Hemlock could be BT with large blowdown for Birch. October 27, 1983, Milo Stefan found location tag on slab of fallen Hemlock - east instead of west. Found plantation post. June 11, 1984, Milo Stefan - distance from C1 places corner east of Kolbe's tag. Using Kolbe's data east 24 links, located a small pile of stone, from which the remains of a 16"-18" Hemlock, S.832°E., 441 links was found. Placed a 2" x 36" aluminum monument at called distance from Hemlock off 874, West, 24 links.
- In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.)

 Describe witness monuments.
- (d) Show a plan view drawing depicting the relevant monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. indicate north.

U. S. PUBLIC LAND SURVEY MONUMENT RECORD

INSTRUCTIONS:

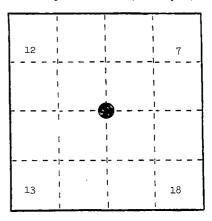

This record shall show the location of the corner and shall include all of the following nine elements (a through i).

(a) Identify the corner by reference to the U.S. public land survey system.

O = Corner monument restored.

Section corner to Sections 7, 12, 13, and 18, T.34N., R.14-15E.

REGISTER'S OFFICE Forest County, Wis. Received for record this I day of I day Aschenbranner Register of Deeds

(b) Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

In 1857, Artemas Curtis placed post at 80.00 chains with the following BTs: Sugar, 16", N.14°E., 10 links; Sugar, 16", S.60°E., 35 links; Sugar, 10", S.52°W., 39 links; Sugar, 22", N.68°W., 31 links.

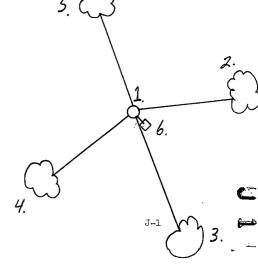

June 23, 1910, Nathan Smith made new BTs: Sugar, 8", N.82°E., 75 links; Sugar, 12", S.18°E., 52 3/4 links. The above evidence is no longer locatable due to road construction and pasture.

August 18, 1980, Milo E. Stefan found 1 1/2" iron pipe 4" below road surface and accepted this position as the best remaining evidence of the corner.

- in the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.)

 Describe witness monuments. (c)
- (d) Show a plan view drawing depicting the relevant monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north.
- 2" x 30" aluminum monument

- 2. Basswood, 10", N.71°E., 86.73 feet 3. Butternut, 12", S.15°E., 140.74 feet 4. Sugar Maple, 8", S.57°W., 113.00 fee
- Sugar Maple, 8", S.57°W., 113.00 feet Sugar Maple, 4", N.13°W., 159.25 feet Steel Sign Post, S.12°E., 17.3 feet

Book 2, Page 18

(e) Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (d), above. Show the distances between the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 2 of the witness monuments shown on the drawing in (d), above.

- (f) Was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location?
- (2) a found perpetuated location
- (gkh) was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?

U. S. PUBLIC LAND SURVEY MONUMENT RECORD

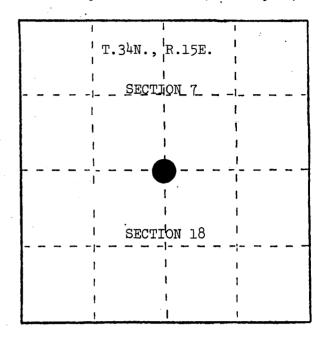

INSTRUCTIONS:

This record shall show the location of the corner and shall include all of the following nine elements (a through 1).

(a) identify the corner by reference to the U.S. public land survey system.

O = Corner monument restored.

Quarter corner to Sections 7 and 18, T.34N., R.15E.

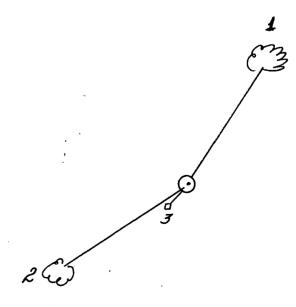

Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

Corner position found marked by intersection of fence lines north, east, and west. Fits distances and bearings of Town of Wabeno Plat of 1890s.

- In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.) Describe witness monuments.
- (d) Show a plan view drawing depicting the relevant monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north.
- Sugar, 6", N.18°E., 21.62 feet Sugar, 8", S.34°W., 21.15 feet
- Steel Sign Post, Southwest, 1.00 feet

PUBLIC LAND SURVEY MONUMENT RECORD U.S.

INSTRUCTIONS:

This record shall show the location of the corner and shall include all of the following nine elements (a through i).

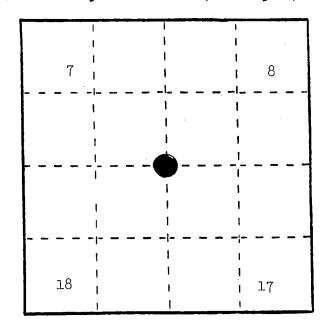

Identify the corner by reference to the U.S. public land survey system.

O = Corner monument restored.

Section corner to Sections 7, 8, 17, and 18, T.34N., R.15E.

REGISTER'S OFFICE Forest County, Wis.

Received for record this day of March. A.D., 19.86 at 10.35 o'clock A.M. and recorded in Vol. CORNER RESTORATIONS Paul Aschenbrenner Register of Deeds

(b) Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

June, 1859, James McBride placed a post at 80.00 chains with the following BTs: Ironwood, 10", N.41°E., 14 links; Birch, 12", S.85°E., 45 links; Birch, 36", S.64°W., 61 links; Birch, 24", N.64°W., 6 links.

In 1906, N. H. Smith found corner. In 1908, O. N. Smith found point of original stake.

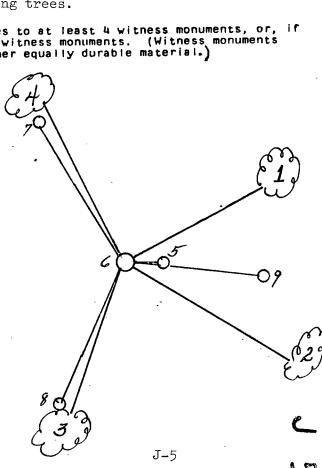

May 26, 1967, Resvick and Cochrane found iron pipe with old scribed post.

September 17, 1977, Paul Smith placed a county monument in place of iron pipe with 1" iron pipe, N.18°50'W., 15.93 feet; 1" iron pipe, S.14°36'20"W., 25.72 feet; 1" iron pipe, S.89°51'20"E.

Milo Stefan accepted county monument and placed bearing trees.

- In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.)

 Describe witness monuments.
- (d) Show a plan view drawing depicting the relevant monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north.

CERTIFIED LAND CORNER RESTORATION

State of Wisconsin
County of Forest ss.
I Jean F. Resvick do hereby certify that on the 28th day of October 19.65, I found evidence of the southeast section corner of Section 11. Township 3h North Range 15 East Fourth Principal Meridian, as described hereon; and that from this evidence I established a new monument and accessories as described hereon to perpetuate the original location of this corner:
Description of original monument and accessories and subsequent restorations: Surveyed in 1859 by James McBride. 80.0 chains North between Sec. 13 & 14 set wood post for corner of Sections 11, 12, 13 and 14. Sugar 12", N 10° W, 20 lks. Birch 12", N 51° E, 31 lks. Hemlock 24", S 40° E, 24 lks. Birch 10", S 40° W, 36 lks. 7.50 ch. East to stream 5 lks. wide runs South.
Description of corner evidence found:
Found 1 3/4 inch diameter iron pipe in mound of rock. From iron pipe: Yellow Birch 25", bears S 40° W, 36 lks. Birch stump bears N 51°E, 31 lks. Hemlock stump hole bears S 40°E, 24 lks. Culvert on stream bears East 7 chains. Road construction has changed stream channel some.
Description of monument and accessories I established to perpetuate the original location of this corner: Replaced 1 3/4 inch iron pipe 3 ft. long with a 2 inch inside diameter galvanized iron pipe, 5 feet long filled with concrete, flanged at bottom with brass cap marked T34N R15E S11 S12 S14 S13 1965 S-802 From which the following new blazed and scribed bearing trees bear: Elm 6", N53° 30'W, 15 ft. or 22.72 lks. Elm 5", N20° E, 21.09 ft. or 31.95 lks. Elm 9", S40° E, 20.36 ft. or 30.85 lks. Elm 8", S47° W, 5.80 ft. or 8.79 lks.

WISCONSIN LAND SURVEYOR S-2663 DATED THIS 2nd DAY OF AUGUST 2012

PUBLIC LAND SURVEY MONUMENT RECORD U.S.

INSTRUCTIONS:

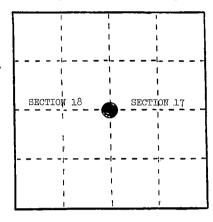

This record shall show the location of the corner and shall include all of the following nine elements (a through I).

Identify the corner by reference to the U.S. public land survey system.

O = Corner monument restored.

Quarter corner to Sections 17 and 18, T.34N., R.15E.

REGISTER'S OFFICE | Forest County, Wis. Received for record this. It day of I was A.D., 1936 at 10:25.c clock .A.M. and recorded in Vol. CRNER RESTORATIONS Faul Aschenbrenner Register of Deeds

(b) Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

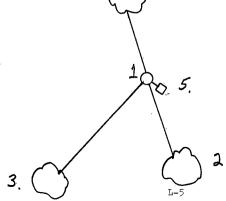

June, 1859, James McBride placed a quarter section post at 40.00 chains with the following BTs: Elm, 10", N.81°E., 27 links; Sugar, 7", S.77°W., 21 links.

December, 1917, Nathan Smith found corner and called 10" Elm, N.81°E., 27 links.

July 18, 1980, Milo Stefan set monument from remains of original BT (Elm). Distance north to section corner fits well. Fences down north and west. Mound of stone at position off Elm bearing tree.

- In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.)

 Describe witness monuments. (c)
- Show a plan view drawing depicting the relevant monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north. (0) Indicate north.
- 2" x 30" aluminum monument
- 2. Black Ash, 12", S.12°E., 25.28 feet 3. Black Ash, 13", S.40°W., 46.70 feet
- 4. Yellow Birch, 9", N.10°W., 27.11 feet
- 5. Steel Sign Post, Southeast, 1.2 feet

Book-1, Page 17

(e) Obscribe any material discrepancy between the location of the corner as restored or reestabilished and the location of that corner as previously restored or reestabilished by distance and direction. Show the discrepancy on the plan view drawing under (d), above. Show the distances between the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 2 of the witness monuments shown on the drawing in (d), above.

(f) was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location?

(1) an obliterated evidence location.

(g&h) Was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?

13, 1,

(type or print name) certify that the corner location shown on this record was determined by me or under my direction and control and that this U.S. Public Land Survey Monument Record is correct and complete to the best of my knowledge and belief.

This record shall show the location of the corner and shall include all of the following nine elements (a through i).

identify the corner by reference to the U.S. public lend survey system. (8)

U.

O = Corner monument restored.

Quarter corner to Sections 16 and 17, T.34N., R.15E., Forest County, Wisconsin.

RECORD

Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

Corner position falls in abandoned Hwy. "32"--all original evidence destroyed. In 1906, Nathan Smith found original BTs standing and ran north to set N 1/16. We restored this corner by extending the line from section corner north through N 1/16 and doubled the distance. This position fits well with fence line west and the call on 1916 railroad right-of-way plat, marked with a 2" x 30" aluminum monument.

- In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.)

 Describe witness monuments.
- (d) Show a plan view drawing depicting the relevant monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north.

Identify the corner by reference to the U.S. public land survey system.

O = Corner monument restored.

Section corner common to Sections 13, 18, 19, and 24, T.34N., R.14-15E.

REGISTER'S OFFICE } Received for record this // day of // AD., 19.40 at 10:05.0 clock A.M. and recorded in Vol. (PRINER RESTORATIONS) Forest County, Wis. Ascherbranner Register of Deeds

Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

In 1857, Artemas Curtis placed a post at 80.00 chains for the section corner with the following BTs: 14" Sugar, S.62°W., 55 links; 12" Sugar, N.32°W., 40 links; 10" Elm, N.55°E., 34 links; 10" Sugar, S.55°E., 31 links.

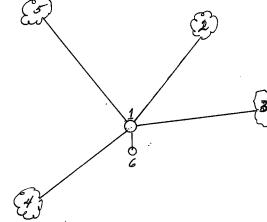

In 1909, J. A. Melindy's notes state that H. L. Harris restored this corner and Melindy placed a new Cedar post with stones around; also, set new BT: 6" Birch, S.73 1/4°E., 10 links--a fence post 4 links north.

May 1, 1985, Milo Stefan placed a 2" x 30" monument in mound of stone that fits the Melindy bearing tree and a post attached to barbed wire 3 1/2 feet northerly.

- In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.)

 Describe witness monuments.
- Show a plan view drawing depicting the relevant monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. (d) Indicate north.
- 1. 2" x 30" aluminum monument in a mound of stone.

- Sugar Maple, 12", N.27°E., 34.36 feet Sugar Maple, 6", N.84°E., 65.20 feet Sugar Maple, 12", S.61°W., 23.13 feet Sugar Maple, 4", N.30°W., 55.25 feet Steel Sign Post, South, 7.8 feet
- 6.
- 7. Corner restored by the 1981 survey bears N.47°52'W., 15.4 feet

Book 2, Page 24

N-1

It was felt that the Melindy position was stronger than the two stump hole positions of 1981. The NW 1/4 could then be subdivided to conform with the 1909 Melindy survey.

- Was the corner restored through acceptance of (1) an obliterated evidence location, or, $\{2\}$ a found perpetuated location?
- (1) an obliterated evidence location.
- (gkh) was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?

Identify the corner by reference to the U.S. public land survey system.

O = Corner monument restored.

Quarter corner to Sections 18 and 19, T.34N., R.15E.

REGISTER'S OFFICE | Forest County, Wis. Received for proord this Haday of Manual AD. 19 He at 10:35 o'clock AM and recorded In Vol. forther RESTORATIONS Aschenbranner ul Register of Deeds

Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

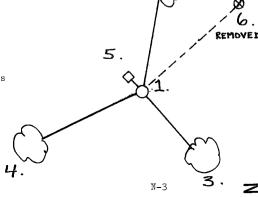

June, 1859, James McBride placed quarter section post at 42.00 chains with the following BTs: 16" Birch, S.24°W., 34 links; 12" Birch, N.30°W., 15 links.

December 18, 1908, J. J. Melindy located 18" Birch BT stump, N.30°W., 15 links and 19" Birch (standing), marks plain, at S.15°W., 13 1/4 links. (Note error that Melindy found in original SW BT.) Melindy made two new BTs: 18" Elm, S.20°W., 67.2 links; 16" Birch, N.37°E., 93.6 links.

June 6, 1985, Milo Stefan found post hole and stump of original SW bearing tree. Monument was placed in post hole supported by original evidence of the SW Birch BT. J. J. Melindy had both original BTs and made two new BTs. Position is supported by bearing distances between the C 1/4 to CN 1/16 and northerly to this position.

- in the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.)

 Describe witness monuments.
- Show a plan view drawing depicting the relevant monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. (d) Indicate north.
- 2" x 60" aluminum monument
- White Oak, 8", N.13°E., 29.25 feet Twin White Oak, 6", S.45°E., 18.89 feet 3.
- White Oak, 8", S.58°W., 50.96 feet ¥.
- Steel Sign Post, Northwest, 0.8 feet
- Corner restored by the 1981 survey bears N.47°56'E., 38.9 feet

Book: 2, Page 39

The 1981 survey placed this corner by lost methods. With the location of the Melindy notes, additional information allowed the location of the original corner to be restored.

- Was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location?
- (1) an obliterated evidence location.

(g&h) was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?

Stefan Milo E. (type or print name) certify that the corner location shown on this record was determined by me or under my direction and control and that this U.S. Public Land Survey Monument Record is correct and complete to the best of my knowledge and belief.

PUBLIC LAND SURVEY MONUMENT RECORD S.

INSTRUCTIONS:

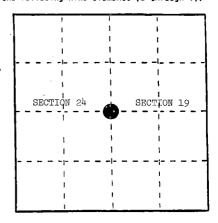

This record shall show the location of the corner and shall include all of the following nine elements (a through I).

(a) identify the corner by reference to the U.S. public land survey system.

O = Corner monument restored.

Quarter corner to Sections 19 and 24, T.34N., R.14-15E.

Received for record this J day of John A.D., 19.40. at 10.50. o'clock A.M. and recorded in Vol ORMER RESTORATIONS page J. REGISTER'S OFFICE | Forest County, Wis. Paul Aschenbrenner Register of Deeds

(b) Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

July, 1857, Artemas Curtis placed a wood post with the following BTs: 25" Hemlock, S.85°E., 26 links; 12" White Birch, N.35°W., 39 links.

In 1909, N. H. Smith located original corner and made new BTs: 7" Sugar, N.1/2°W., 19 1/2 links; 23" Sugar, S.31°W., 24.66 links. In January, 1909, J. A. Melindy found original corner and placed a 4" x 4" x 36" Elm post with stone on each side of post (east and west).

August 20, 1980, Milo E. Stefan found fence corner and stump holes to fit to original BTs and Smith's 7" Sugar.

May 5, 1985, Milo E. Stefan, using recently found J. A. Melindy notes, located the stone alongside post hole with original Hemlock stump and Smith's 23" Sugar, a large stump at proper bearing and distance. Original Birch stump is only a stump hole.

- In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.)

 Describe witness monuments.
- Show a plan view drawing depicting the relevant monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north.

2" x 30" aluminum monument

Sugar Maple, 10", N.35°E., 8.91 feet Sugar Maple, 6", S.28°E., 25.90 feet Sugar Maple, 10", N.80°W., 83.42 feet Steel Sign Post, South, 2.0 feet

Stefan, 1980--Position bears N.88°12'44"W., 39.35 feet.

Book-2, Page 31

Notes by J. J. Melindy were located in 1984. These notes indicated that Melindy had the original scribed BTs and called the stones and two new BTs.

- (f) Was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location?
- (1) an obliterated evidence location.
- (gkh) was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?

	PUBLIC LAND SURVEY MONUMENT RECORD Index No. P.Q-21
State of Wisconsin }ss.	History of original corner establishment:
County of Forest Ss. I. Gary L. Pisoni , do hereby certify that on the 2.1st day of August 19.91., I found evidence of the Meander corner swywexwix Between Sections 23 and 24. Township 41 , North, Range	Original Government Survey in 1865 by William E. Daugherty, North between Sections 23 and 24, at 30.5 chains, set meander post, from which the following bear: Cedar 10'' S 41'W 16 links Cedar 9'' S 77°E 22 links
	Description of corner evidence found: No original corner evidence was recovered.
as described hereon to perpetuate the original location of this corner. Resident witnesses:	I tried to use the river ties to position the meander corner between Sections 23 and 24 but by using these ties, it distorted the Section line too far out of position. Since the Section lines in this project area are running basically North and South and to stay consistent with the remaining N/S Section lines in the area, I felt that extending the East line of Section 26 to the South bank of the Brule River was the best available approach to re-establishing the meander corner between Sections 23 and 24.
·	
	Description of monument and accessories I established to perpetuate the original location of this corner. At the corner position, set a $2\frac{1}{2}$ inch diameter aluminum pipe monument, 3 feet long, 3 inches above the ground, with an aluminum cap stamped: T41N, R14E, Meander corner, \$23, \$24, 1991, \$-1634, from which the following new blazed and scribed bearing trees bear: (measurements taken to a nail in side of tree) Ash 6" N 02 W 15.65 feet Sugar Maple 4" \$ 750 E 8.19 feet Sugar Maple 8" \$ 170 W 16.51 feet Balsam 3" \$ 600 W 18.04 feet Steel sign post South 1.02 feet Monument is approximately 20 feet from river shoreling.
SECTION 23	Dated at Iron River, MI , Wis, this 16th day of February 19.92. Signature Say J. Pooru Title Land Surveyor Registration No. S-1634 (County Surveyor, Registered Land Surveyor, or other duly authorized official)
	Office of Register of Deeds, County of House I hereby certify that the within instrument was filed in this office for record on the day of House I have I ha
Corner monument restored.	ByDeputy

See drawing below.

(f) Was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location?

```
Restored through 4 ost corner proportionate methods.
     (gkh) Was the corner reestablished through lost corner proportionate methods? If so, show the
method, including the directions and distances to other public land survey corners used
evidence or used for proportioning in determining the corner location?

U. S. PUBLIC LAND SURVEY MONUMENT RECORD

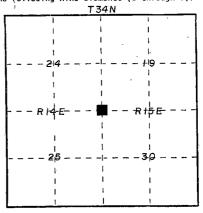

INSTRUCTIONS:

This record shall show the location of the corner and shall include all of the following nine elements (a through i).

(a) Identify the corner by reference to the U.S. public land survey system.

= Corner monument restored.

Section corner to Section 19 & 30, Township 34 North, Range 15 East and to Sections 24 and 25, Township 34 North, Range 14 East. Corner was established in July 1857 by Artemas Curtis with bearing trees marked: Hemlock 12" N 33°E 24 links, Sugar 9" S 26°E 27 links; Yellow Birch 28" N 47° W 23'links; Hemlock 12" S 68°W 46 links.

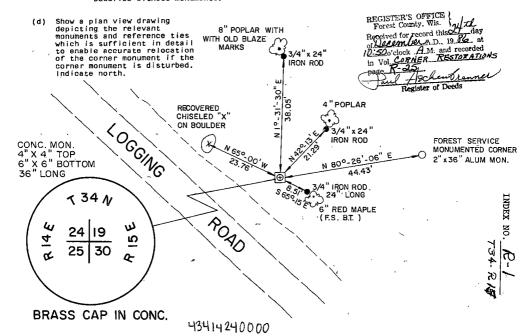

(b) Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

On May 21, 1982 Milo E. Stefan stated that he located the remains of the Northeast, Southwest and Northwest B.T.'s and the Southeast position was a stump hole. He also stated that there was possible post point remains.

On January 19, 1909 J.A. Melindy, surveyor identified the original corner position in agreement with all of the stumps of the original bearing trees. He witnessed this corner with a chiseled X on a 4' x 3.2' granite boulder. On February 13, 1909 J.A. Melendy certified that he surveyed Section 19, T 34 N, R 15 E according to law. There are no visible bearing trees or stumps from bearing trees today. There are numerous ground depressions in this area. The apparent depressions used by Stefan do not agree with the original bearings and distances by several feet.

(c) In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.) Describe witness monuments.

Stefen's position is N 80°-26'-26" E 44.43 feet from the corner recovered by Melendy in 1909.

(f) Was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location?

Distance to South One-Quarter corner is 2,789.73. Melendy's measurement to South One-Quarter corner was 2,798.40. Original $A_{\chi_{0}} = \{0, \infty\}$ Government measurement was 2,791.80.

(g&h) Was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?

Bernard L. Watermolen (type or print name) certify that the corner location shown on this record was determined by me or under my direction and control and that this U.S. Public Land Survey Monument Record is correct and complete to the best of my knowledge and belief.

U. S. PUBLIC LAND SURVEY MONUMENT RECORD

INSTRUCTIONS:

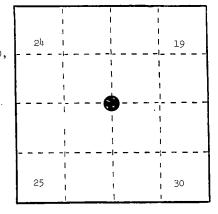

This record shall show the location of the corner and shall include all of the following nine elements (a through i).

(a) identify the corner by reference to the U.S. public land survey system.

O = Corner monument restored.

Section corner to Sections 19, 24, 25, and 30, T.34N., R.14-15E.

Paul Aschenbrenner Register of Deeds

(b) Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

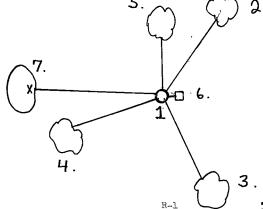

July, 1857, Artemas Curtis set post at 80.00 chains with the following BTs: Hemlock, 12", N.33°E., 24 links; Sugar, 9", S.26°E., 27 links; Yellow Birch, 28", N.47°W., 23 links; Hemlock, 12", S.68°W., 46 links.

January 19, 1909, J. J. Melindy set $5" \times 5" \times 40"$ Cedar post with stones around. He stated, "Stumps of original trees all agree." "X" on stone, N.65°W., 36 links.

May 21, 1982, Milo E. Stefan located remains of the northeast, southwest, and northwest original BTs. The southeast position was a stump hole. Corner position fell along east side of a boulder. Excavation of position revealed woody remains of a possible post point 8"-10" below ground surface.

- In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.)

 Describe witness monuments.
- (d) Show a plan view drawing depicting the relevant monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north.
- 2" x 36" aluminum monument
- Sugar Maple, 8", N.37°E., 33.68 feet Sugar Maple, 5", S.23°E., 40.26 feet Red Maple, 6", S.65°W., 37.68 feet Sugar Maple, 4", N.2°W., 19.78 feet
- 4.
- 6.
- Steel Sign Post, East, 0.7 feet
- "X" on 3' x 5' x 4' boulder, 7. N.87°40'13"W., 65.40 feet

Book: 2, Page 80

(e) Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (d), above. Show the distances between the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 2 of the witness monuments shown on the drawing in (d), above.

Melindy's position from the only reference he gave ("X" on boulder, N.65°W., 36 links) is S.80°26'05"W., 44.43 feet from the monumented restored position off the remains of the original bearing trees.

- (f) Was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location?
- (1) an obliterated evidence location.
- (gkh) was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?

I, Milo E, Stefan

(type or print name) certify that the corner location shown on this record was determined by me or under my direction and control and that this U.S. Public Land Survey Monument Record (correct and complete to the best of my knowledge and belief.

U. S. PUBLIC LAND SURVEY MONUMENT RECORD

INSTRUCTIONS:

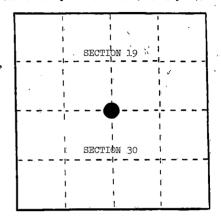

This record shall show the location of the corner and shall include all of the following nine elements (a through I).

(a) identify the corner by reference to the U.S. public land survey system.

O = Corner monument restored.

Quarter corner to Sections 19 and 30, T.34N., R.15E.

REGISTER'S OFFICE | Forest County, Wis. Received for record this Hadday of Manch A.D., 19.86 at of Ligarity A.D., 19.66 at 10:25 o'clock A.M. and recorded in Vol Corner RESTORATIONS, page R. 3 Soul Asc Aschenbrenner Register of Deeds

(b) Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

June, 1859, James McBride set post at 42.30 chains with the following BTs: Sugar, 15", N.6 $\dot{7}$ 9W., 6 links; Cedar, 10", S.60°E., 15 links.

December 19, 1908, J. A. Melindy found 4" x 4" x 40" Cedar post, original Maple--with marks plain, original Cedar -- a stump. He placed an "X" on a 5' x 6' x 3' boulder, $5.74^{\circ}W., 19 1/3 links.$

May 16, 1984, Milo E. Stefan found "X" on boulder from which a post hole with small Cedar post nearly rotted away. Original Maple is a stump hole and original Cedar is a turned-out stump -- very splintered.

in the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.)

Describe witness monuments. (c)

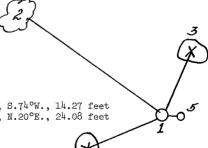

Show a plan view drawing depicting the relevant monuments and reference ties which is sufficient, in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north.

 $2" \times 30"$ aluminum monument ì.

Sugar Maple, 8", N.61°W., 80.18 feet "X" on top of boulder (5' x 6' x 3'), S.74°W., 14.27 feet ٦.

"X" on top of boulder (3' x 3' x 2'), N.20°E., 24.08 feet

Steel Sign Post, East, 3.3 feet 5.

(e) Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (d), above. Show the distances between the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 2 of the witness monuments shown on the drawing in (d), above.

(f) Was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location?

(1) an obliterated evidence location.

(gkh) was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?

(type or print name) certify that the corner location shown on this record was determined by me or under my direction and control and that this U.S. Public Land Survey Monument Record is correct and complete to the best of my knowledge and belief.

CERTIFIED LAND CORNER RESTORATION

State of Wisconsin
County of Forest ss.
I Milo E. Stefan , do hereby certify that on the 11th day of August , 19 82 I found evidence of the North Quarter corner of Section 27 Township 34 North , Range 15 East , Fourth Principal Meridian, as describe hereon; and that from this evidence I established a new monument and accessories as described hereon to perpetuate the original location of this corner:
Description of original monument and accessories and subsequent restorations:
Surveyed in 1859 by James McBride 39.98 chains, set wood post Birch, 20", N88°E, 108 lks.* Sugar, 8", S32°E, 122 lks.
*Melindy made note that this BT was 118 lks. distant
Description of corner evidence found:
Birch, N88°E, 118 lks., found by J. J. Melindy Local Evidence: In 1909, N. Smith set two new BTs: Hemlock, 12", N60 3/4°E, 18 1/3 lks., 12.10' Cedar, 24", N42 3/4°W, 25 1/2 lks., 16.83' In 1980, found Hemlock root pattern, N60°E, 12.0' and Cedar windfall, 26", N42°W, 17.0'
Description of monument and accessories I established to perpetuate the location of this corner:
Placed a 2" x 36" aluminum pipe with an aluminum cap in mound of stone stamped as follows T34N, R15E, \(\frac{1}{4}\), S22, S27, 1982, RLS-1558 From which the following bear: Red Maple, 7", N40°E, 21.61' Red Maple, 5", S69°W, 41.73' Hemlock, 10", N36°W, 35.58' Steel Sign Post, Southeast, 2.4'

U. S. PUBLIC LAND SURVEY MONUMENT RECORD

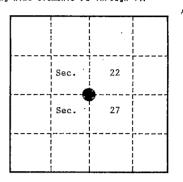

INSTRUCTIONS:

This record shall show the location of the corner and shall include all of the following nine elements (a through i).

(q) Identify the corner by reference to the U.S. public land survey system.

O - Corner monument restored.

Quarter Corner between Sections 22 and 27, T.34N., R.15E., Forest County, Wisconsin.

(b) Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

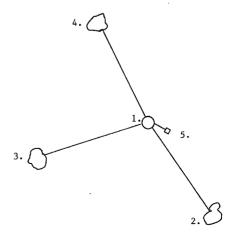

In 1859 James McBride set corner and the following bearing trees; Birch, 20", N.88°E., 108 links (71.28 feet), Sugar, 8", S.32°E., 122 links (80.52 feet).

In 1909 N. Smith made note that the original Birch bearing distance is 118 links (77.88 feet). Smith made the following new B.T.'s; Hemlock, 12", N.60 $3/4^{\circ}E$., 18 1/3 links (12.10 feet), Cedar, 24", N.42 $3/4^{\circ}W$, 25 $\frac{1}{2}$ links (16.83 feet).

In 1980, Milo Stefan found a Hemlock root pattern, N.60°E., 12.0 feet, and a cedar windfall, 26", N.42°W., 17.0 feet. He placed a 2" x 36" Aluminum Pipe with an Aluminum Cap stamped to identify corner. He blazed and scribed new B.T.'s; Red Maple, 7", N.40°E., 21.61 feet, Red Maple, 5", S.69°W., 41.73 feet, Hemlock, 10", N.36°W., 35.58 feet, Steel Sign Post, Southeast, 2.4 feet. (Monumentation done in 1982).

On September 7, 1993, Alan D. Harrison (RLS) found all of 1980 B.T.'s as set by Milo Stefan. The Northeast Maple B.T. is a tip-out, so he blazed and scribed a new B.T.; Red Maple, 6", 3.41°E., 32.09 feet.

- (c) In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (witness monuments shall be made of concrete, natural stone, iron orother equally durable material.)
- (d) Show a plan view drawing depicting the relevent monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed, indicate north.
- 2½" x 36ⁿ Aluminum Pipe with tablet stamped to identify corner.
- Red Maple, 6", S.41°E., 32.09 feet.
- Red Maple, 7", S.69°W., 41.73 feet.
- 4. Hemlock, 12", N.36°W., 35.58 feet.
- 5. Steel SIgn Post, Southeast, 2.4 feet.

(e) Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (d), above. Show the distances beteen the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 2 of the witness monuments shown on the drawing in (d), above.

None

(f) Was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location ?

(2) found perpetuated location

(g & h) Was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?

No

U. S. PUBLIC LAND SURVEY MONUMENT RECORD

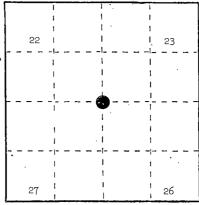

INSTRUCTIONS:

This record shall show the location of the corner and shall include all of the following nine elements (a through !).

Identify the corner by reference to the U.S. public land survey system. (8)

O = Corner monument restored.

Section corner to Sections 22, 23, 26, and 27, T.34N., R.15E., Forest County, Wisconsin.

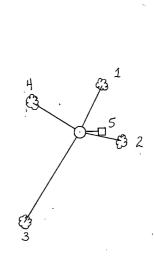

Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

Corner position found marked by a 12" x 12" x 16" stone set by J. J. Melindy and recovered by N. A. Smith in 1910. Also, original bearing tree remains were found. We replaced the stone with a 2" x 36" aluminum monument.

- (c) In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.) Describe witness monuments.
- (d) Show a plan view drawing depicting the relevant monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north.
- 1. Sugar Maple, 8", N.14°E., 23.62 feet
 2. Sugar Maple, 13", S.73°E., 21.00 feet
 3. Sugar Maple, 6", S.25°W., 47.78 feet
 4. Sugar Maple, 9", N.57°W., 16.89 feet
- 5. Steel Sign Post, East, 1.90 feet

REGISTER'S OFFICE Forest County, Wis.) Received for record this......day on page R. 17. Aschenbionner

(e) Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (d), above. Show the distances between the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 2 of the witness monuments shown on the drawing in (d), above.

No.

(f) Was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location?

Found perpetuated location.

(gkh) Was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?

No.

(1) I. Milo E. Stefan

U. S. PUBLIC LAND SURVEY MONUMENT RECORD

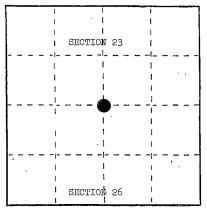

INSTRUCTIONS:

This record shall show the location of the corner and shall include all of the following nine elements (a through i).

identify the corner by reference to the U.S. public land survey system. (0)

Corner monument restored.

Quarter Corner to Sections 24 and 25, T.34N., R.15E., Forest County, Wisconsin.

> Received for record this lotting of the second of record this lotting of the second of REGISTER'S OFFICE Forest County, Wis. ABChents Register of Deeds Grenner

(b) Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

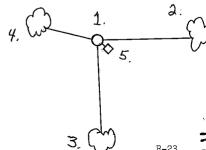

In 1859, James McBride set quarter post and made the following BTs: Hemlock, 12", N2°E., 69 links; Fir, 10", S.60°E., 11 links.

In November, 1986, Alan Harrison found blazed lines east, west, and south, but no corner evidence. Corner restored by proportionate measure between section corners mile east and west. Position fits very near blazed lines.

- In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.)

 Describe witness monuments. (C)
- Show a plan view drawing depicting the relevant monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north,
- 1. $2\frac{1}{2}$ " x 36" aluminum monument stamped to identify corner location.

- Sugar, 10", N.88°E., 32.73 feet. Sugar, 12", S.3°E., 18.98 feet. Hemlock, 12", N.75°W., 7.79 feet.
- 5. Steel Sign Post, Southeast, 0.85 feet.

(a) identify the corner by reference to the U.S. public land survey system.

O = Corner monument restored.

Quarter corner common to Sections 26 and 27, T.34N., R.15E., Forest County, Wisconsin.

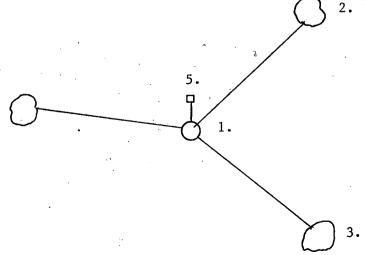

Describe any record evidence, monument evidence, occupational evidence, testimonial evidence any other material evidence you considered, and whether the monument was found or placed.

In 1859, James McBride set corner post and the following bearing trees: Sugar, 24", S.50°E., 12 links (7.92 feet), Sugar, 10", N.70°W., 35 links (23.10 feet), North, 17.5 chains, creek 20 links wide, bears East.

On August 20, 1993, Alan D. Harrison (RLS) restored the corner position at proportionate distance and on line between the Northeast and Southeast Section Corners of Section 27.

No corner evidence was recovered.

- (c) In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (witness monuments shall be made of concrete, natural stone, iron orother equally durable material.)
- Show a plan view drawing depicting the relevent monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north. (d)
- $2\frac{1}{2}$ " x 36" Aluminum monument with tablet stamped to identify corner.
- 2. Sugar, 9", N.45°E., 34.11 feet.
- Sugar, 8", S.52°E., 30.77 feet. 3.
- Hemlock, 12", N.84°W., 27.94 feet.
- 5. Steel Sign Post, North, 1.10 feet.

(a) Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (d), above. Show the distances betten the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 2 of the witness monuments shown on the drawing in (d), above.

 $\mathcal{L}^{\sigma_{\mathcal{A}}}(\mathcal{L}^{\sigma_{\mathcal{A}}(\mathcal{L}^{\sigma_{\mathcal{A}}}(\mathcal{L}^{\sigma_{\mathcal{A}}}(\mathcal{L}^{\sigma_{\mathcal{A}}(\mathcal{L}^{\sigma_{\mathcal{A}}}(\mathcal{L}^{\sigma_{\mathcal{A}}}(\mathcal{L}^{\sigma_{\mathcal{A}}(\mathcal{L}^{\sigma_{\mathcal{A}}(\mathcal{A}}(\mathcal{L}^{\sigma_{\mathcal$

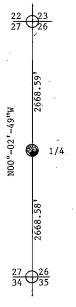

None.

(f) Was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location 7

No.

(g 8 h) Was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as avidence or used for proportioning in determining the corner location?

Yes.

DOCUMENT NUMBER 133444

PUBLIC LAND SURVEY MONUMENT RECORD

INSTRUCTIONS:

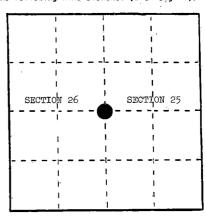

This record shall show the location of the corner and shall include all of the following nine elements (a through I).

(a) identify the corner by reference to the U.S. public land survey system.

O = Corner monument restored.

Quarter Corner to Sections 25 and 26, T.34N., R.15E., Forest County, Wisconsin.

REGISTER'S OFFICE | Forest County, Wis. Received for record this 10 day of Mullion A.D., 1287 at 8.25 o'dock A.M. and recorded in Vol. CRNER RESTORATIONS page ASCLUMENTS. Aschenfierne Register of Dech

(b) Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

In 1859, James McBride set quarter post and made the following BTs: Black Ash, 8", N.75°E., 8 links; Sugar, 10", S.52°W., 47 links.

In 1974, J. Resvick searched area for corner, but found no evidence.

In November, 1986, Alan Harrison pulled to search area. Just east of point, found old, squared wood post lying in swamp next to post point. Evidence of original BTs not recovered, but distance south to swamp edge fits with ½ chain original call.

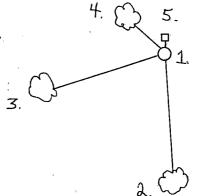

- In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.) Describe witness monuments. (0)
- (d) Show a plan view drawing depicting the relevant monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north.
- 1. 2½" x 60" aluminum monument stamped to identify corner location.

 Sugar, 9", S.4°E., 40.97 feet.

 Hemlock, 13", S.69°W., 48.67 feet.

 Black Spruce, 8", N.52°W., 7.09 feet.

 Steel Sign Post, North, 1.40 feet.

T.34N., R.15E., Forest County, Wisconsin.

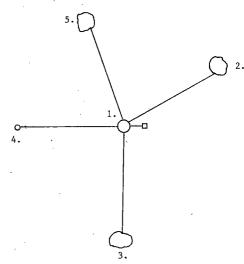

(b) Describe any record evidence, monument evidence, occupational evidence, testimonial evidence of any other material evidence you considered, and whether the monument was found or placed.

In 1859, James McBride set corner post and the following bearing tress: Tamarack, 6", N.24°W., 22 links (14.52 feet), Tamarack, 7", N.46°E., 33 links (21.78 feet), Spruce, 7", S.37°W., 20 links (13.20 feet), Tamarack, 7", S.37°W., 47 links (31.02 feet), 5.00 chains South, stream 20 links wide bears East. 9.00 chains East, stream 20 links wide, runs Northeast.

In 1906, Nathan Smith's highway survey recovered original witness stumps and a stake set by W.L. Harris.

On June 10, 1993, Alan D. Harrison (RLS) restored the corner using retracement of N. Smith's 1906 survey, the center-line of an old road and creek calls East and South.

- (c) In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (witness monuments shall be made of concrete, natural stone, iron orother equally durable material.)
- (d) Show a plan view drawing depicting the relovent monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north.
- 1. 2½" x 36" Aluminum monument with tablet stamped to identify corner.
- 2. Tamarack, 3", N.58°E., 43.06 feet.
- 3. Tamarack, 3", S.02°W., 42.95 feet.
- 4. Iron Pipe, 1" dia., S.89°W., 28.47 feet.
- 5. Tamarack, 4", N.27°W., 35.23 feet.
- 6. Steel Sign Post, East, 1.07 feet.

(a) Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (d), above. Show the distances between the corner as previously restored or reestablished and (i) the corner as restored or reestablished, and (2) to at least 2 of the witness monuments shown on the drawing in (d), above.

The state of the State of the s

None.

- (f) Was the corner restored through acceptance of (1) an obliterated syldence location, or, (2) a found perpetuated location 7
 - (1) an obliterated evidence location.
 - g Bih) Was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?

No.

CONTRACTOR OF STREET

U. S. PUBLIC LAND SURVEY MONUMENT RECORD

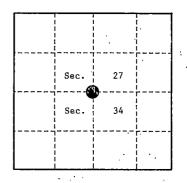

INSTRUCTIONS:

This record shall show the location of the corner and shall include all of the following nine elements (a through 1).

(q) Identify the corner by reference to the U.S. public land survey system.

O = Corner monument restored.

Quarter corner common to Sections 27 and 34, T.34N., R.15E., Forest County, Wisconsin.

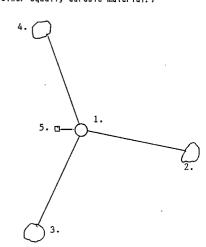

(b) Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

In 1859, James McBride set corner post and the following bearing trees: Hemlock, 12", N.31°W., 5 links (3.30 feet), Birch, 12", S.32°W., 45 links (29.70 feet), West, 2.00 chains, enter swamp, bears Northwest-Southeast.

In 1906 and 1910, Nathan Smith (RLS) surveyed roads from the Southwest Section Corner of Section 27 to the South Quarter Corner of Section 27.

On August 25, 1993, Alan D. Harrison (RLS) restored the corner using the intersection of Forest Road #2143 from the North and an old woods road from the West. The old road from the West appears on aerial photos to have been built on N. Smith's 1906 highway survey. The Forest Road North appears on aerial photos to have been built on N. Smith's 1910 highway survey.

- . (c) In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (witness monuments shall be made of concrete, natural stone, iron orother equally durable material.)
 - (d) Show a plan view drawing depicting the relevent monuments and reference ties which is sufficient in detail to enable accurate relecation of the corner monument if the corner monument is disturbed, indicate north.
 - 2½" x 36" Aluminum monument with tablet stamped to identify corner.
 - 2. West Fork, Twin Maple, 9", S.72°E., 46.63 feet.
 - 3. Maple, 10", S.29°W., 32.09 feet.
 - 4. Maple, 7", N.30°W., 41.34 feet.
 - 5. Steel Sign Post, West, 0.82 feet.

PUBLIC LAND SURVEY MONUMENT RECORD U.

INSTRUCTIONS:

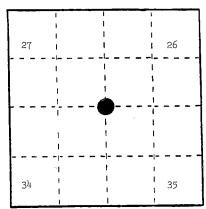

This record shall show the location of the corner and shall include all of the following nine elements (a through i).

(a) identify the corner by reference to the U.S. public land survey system.

O = Corner monument restored.

Section Corner to Sections 26, 27, 34, and 35, Township 34 North, Range 15 East, Forest County, Wisconsin.

> REGISTER'S OFFICE Forest County, Wis. Received for record this Aladay of Astron A.D. 19.87 at of Ahris A.D., 19.87 at 9.20 o'clock A.M. and recorded in Vol. CORNER RESTORATIONS Aschendre Register of Deeds

(b) Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

In 1859, James McBride set a wood post with the following BTs: Sugar, 10", N.21°E., 32 links; Linm, 12", N.40°W., 52 links; Sugar, 10", S.39°E., 54 links; Sugar, 14", S.54°W., 55 links.

In 1909, N. A. Smith found original BTs in good shape. Found Linn distance to be 49 links, not 52 links as original notes indicated. He set a new post at the BT distances.

In 1982, Milo Stefan (RLS) found 2" x 18" iron pipe in a mound of stone--no original evidence. In 1987, Alan Harrison (RLS) found 2" x 18" iron pipe as per Stefan. Tied in pipe to traverse of Section 34 and position fits well. Accepted pipe position as best remaining evidence of corner position and replaced pipe with a 2" x 36" aluminum monument with tablet stamped to identify corner.

- In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.)

 Describe witness monuments.
- Show a plan view drawing depicting the relevant monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. (d) Indicate north.

U. S. PUBLIC LAND SURVEY MONUMENT RECORD

INSTRUCTIONS:

This record shall show the location of the corner and shall include all of the following nine elements (a through i).

(a) Identify the corner by reference to the U.S. public land survey system.
 Corner monument restored.

Quarter corner common to Sections 32 and 33, T.34N., R.15E., Forest County, Wisconsin.

(b) Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

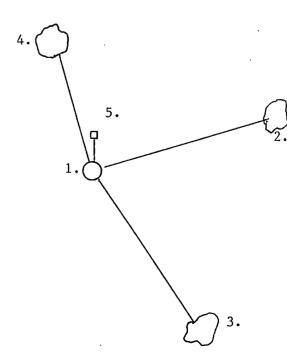

In 1859, James McBride set corner post and the following bearing trees: Hemlock, 15", S.69°W., 32 links (21.12 feet), Sugar, 12", S.70°E., 10 links (6.60 feet).

In 1899, Nathan Smith (RLS) found both original B.T.'s. He set a new stake and made a new B.T.; Maple, 12", N.25°E., 45 links (29.70 feet). He noted that the original SW B.T. distance was in error at 32 links. Should be 22 links.

In 1975, Jean Resvick (RLS) found a fence corner from which the remains of a Hemlock stump bear S.69°W., 22 links (14.52 feet) Note: (original surveyor errored on this distance as noted by N. Smith). Resvick also found Sugar Maple remains in a large Sugar root hole system, N.25°E., 29.70 feet. In the hole of fence post Resvick set a 2" x 36" galvanized iron pipe with a brass cap stamped to identify corner. Made the following B.T.'s: Hemlock, 7", N.26°W., 9.45 feet, Sugar, 13", N.74°E., 34.57 feet, Basswood, 7", S.46°E., 22.21 feet, Steel fence post, North, 1.5 feet.

On September 8, 1993, Alan D. Harrison (RLS) found the monument and accessories as set by Resvick in 1975. Southeast Basswood B.T. is dead and down. Blazed and scribed a new B.T.: Sugar, 8", S.48°E., 30.20 feet.

- (c) in the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (witness monuments shall be made of concrete, natural stone, iron orother equally durable material.)
- (d) Show a plan view drawing depicting the relevent monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north.
 - 1. 2" x 36" galvanized iron pipe with brass cap stamped to identify corner.
 - 2. Sugar, 13", N.74°E., 34.57 feet.
 - 3. Sugar, 8", S.48°E., 30.20 feet.
 - 4. Hemlock, 10", N.26°W., 9.45 feet.
 - 5. Steel Fence Post, North, 1.5 feet.

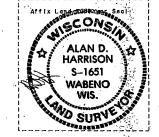

(e) Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (d), above. Show the distances beteen the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 2 of the witness monuments shown on the drawing in (d), above.

U. S. PUBLIC LAND SURVEY MONUMENT RECORD

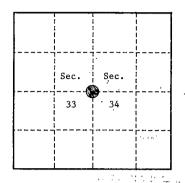

INSTRUCTIONS:

This record shall show the location of the corner and shall include all of the following nine elements (a through !).

(a) Identify the corner by reference to the U.S. public land survey system.

O = Corner monument restored.

Quarter corner common to Sections 33 and 34, T.34N., R.15E., Forest County, Wisconsin.

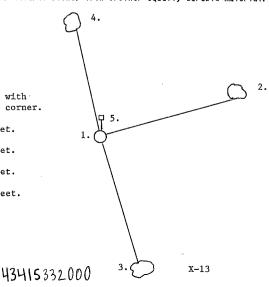

(b) Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

In 1859, James McBride set corner post and the following bearing trees: Cedar, 40", N.16°E., I4 links (9.24 feet), Tamarack, 10", N.37°W., 8 links (5.28 feet), 1.00 chains South, leave swamp bears Northeast-Southwest.

In 1977, Jean Resvick (RLS) found a 4" x 4" squared post, scribed, with a 1 inch diameter rod alongside it. From post found Tamarack stump, N.43°W., 5.28 feet, dead and down Cedar, N.16°E., 9.24 feet, scribed Cedar, 14", N.71°W., 6.60 feet. Location poster on Cedar, 6", N.76°E., 9.57 feet. Resvick set a 2" x 60" galvanized iron pipe with a brass cap stamped to identify corner. Made the following B.T.'s: Cedar, 13", N.75°E., 29.30 feet, Cedar, 12", N.19°W., 28.97 feet, Steel Sign Post, North, 0.5 feet.

On September 8, 1993, Alan D. Harrison (RLS) found the monument and bearing tress as set by Resvick in 1977. He blazed and scribed a new B.T.: Cedar, 12", S.15°E., 31.15 feet.

- (c) In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (witness monuments shall be made of concrete, natural stone, from orother equally durable material.)
- (d) Show a plan view drawing depicting the relevent monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north.
 - 2" x 60" galvanized iron pipe with brass cap stamped to identify corner.
 - Cedar, 14", N.75°E., 29.30 feet.
 - 3. Cedar, 12", S.15°E., 31.15 feet.
 - 4. Cedar, 14", N.19°W., 28.97 feet.
 - 5. Steel Sign Post, North, 0.5 feet.

(e) Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (d), above. Show the distances between the corner as previously restored or reestablished and (i) the corner as restored or reestablished, and (2) to at least 2 of the witness monuments shown on the drawing in (d), above.

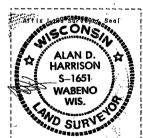

None.

Description of corner evidence found:

No original corner evidence was recovered.

After examining all of the records for the West Section lines of Sections 35.26.and 23 and finding the total actual distance for these lines to be approx. 677' to long and finding that the dist. from Gaspardo Creek to the Brule River is within 85' of GLO dist, and the old blazed lines seem to match the dist, from Gaspardo Creek to the Brule River. I felt that all of the error must lie South of Gaspardo Creek. This same opinion is held by the U.S.F.S. for work they have done further West. I used Gaspardo Creek and the wood post on the Brule River as fixed points and proportionate from there. Since the West 1/4 cor, of Sec. 35 is so close to the creek. I proportioned the 1/4 cor. by extending the bearing from the North to the South and left all of the

remaining error South of the West 1/4 Cor. Description of monument and accessories I established to perpetuate the original location of this corner. At the corner position, set a $2\frac{1}{2}$ diameter aluminum pipe monument, 5 feet long, 3 inches above the ground, with an aluminum cap stamped; T41N R14E,1/4, S34, S35, 1991. S-1634. From which the following new blazed and scribed bearing trees bear; (Measurements are taken to a nail in side of tree)

DOCUMENT NUMBER 132698

PUBLIC LAND SURVEY MONUMENT RECORD IJ.

INSTRUCTIONS:

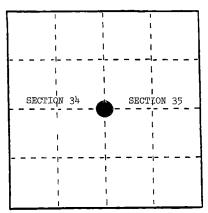

This record shall show the location of the corner and shall include all of the following nine elements (a through I).

(a) identify the corner by reference to the U.S. public land survey system.

O = Corner monument restored.

Quarter Corner to Sections 34 and 35, Township 34 North, Range 15 East, Forest County, Wisconsin.

> REGISTER'S OFFICE | Forest County, Wis. Received for record this 2 aday of And Andrews Reday of Andrews Andrew Register of Déeds

(b) Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

In 1859, James McBride set a wood post with the following BTs: Birch, 12", S.10°W., 16 links; Birch, 12", S.34°E., 8 links.

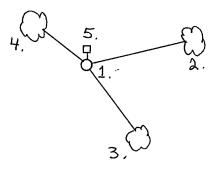

In 1910, N. A. Smith found corner and one of the original BTs standing. He measured 40.37 chains north to northeast corner of Section 34.

In 1982, Milo Stefan (RLS) found 2" iron pipe in a mound of stone, distance to Smith's N 1/16 fits well. No original evidence.

In 1986, Alan Harrison (RLS) found iron pipe in mound of stone as per Stefan. Pipe location fits section subdivision well and is accepted as the corner location. Replaced iron pipe with a 2" x 36" aluminum monument with tablet stamped to identify corner.

- in the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.)

 Describe witness monuments. (c)
- Show a plan view drawing depicting the relevant monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north.
- 2" x 36" aluminum monument with tablet ٦. stamped to identify corner.
- Sugar, 9", N.72°E., 31.01 feet Sugar, 4", S.29°E., 22.41 feet Sugar, 8", N.45°W., 18.03 feet 2.
- 3.
- 4.
- Steel Sign Post, North, 1.55 feet

X = 1.7

Book 12, Page 1

(e) Describe any material discrepancy between the location of the corner as restored or reestabilished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (d), above. Show the distances between the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 2 of the witness monuments shown on the drawing in (d), above.

None.

- (f) Was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location?
- (2) a found perpetuated location.
- (g&h) was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?

No.

(1) 1. Alan D. Harrison
(type or print name) certify that the corner location shown
on this record was determined by me or under my direction and
control and that this U.S. Public Land Survey Monument Record is
correct and complete to the bost of my knowledge and belief.

U. S. PUBLIC LAND SURVEY MONUMENT RECORD

INSTRUCTIONS:

This record shall show the location of the corner and shall include all of the following nine elements (a through I).

(a) Identify the corner by reference to the U.S. public land survey system.

Corner monument restored.

Quarter Corner to Sections 34 and 3, Township 33-34 North, Range 15 East, Oconto and Forest Counties, Wisconsin.

rorest County, Wis.

Received for record this old day of Libral A.D., 19.67 at 9.00 loclock A.M. and recorded in Vollorder RESTORATIONS REGISTER'S OFFICE | Forest County, Wis. Register of Deeds

(b) Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

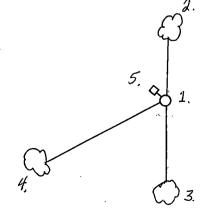

In 1857, Artemas Curtis set a wood post with the following BTs: Yellow Birch, 10", N.35°W., 12 links; Hemlock, 18", S.04°W., 5 links.

In 1976, Milo Stefan (RLS) found the following: 4" x 4" x 2' squared post in a mound of stone: blazed line east and west; no remains of original post or BTs evident.

In 1986, Alan Harrison (RLS) found mound of stone with post hole in center. Position of post hole fits section well as being set by proportion. Accepted post hole as best remaining evidence. Placed a 2" x 36" aluminum monument with tablet stamped to identify corner in post hole.

- in the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.) Describe witness monuments. (c)
- Show a plan view drawing depicting the relevant monuments and reference ties which is sufficient in detail (0) to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north.
- 1. 2" x 36" aluminum monument with tablet stamped to identify corner.

Register of Deeds

Quarter corner to Sections 36, T34N, R15E ...3

Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

In 1857 J McFride seta wood post with:

and 1, T33 N, R15E, Coonto County, Wis

Maple 12" S21W 20 links Hemlock 12" N63E 13 links

Found rotted remains of Hemlock stump with 6" Hemlock progeny N63E 13 links and a 6" Sugar growing out of hardwood stump S21W 20 links. Reset corner from these two bearing tree progeny.

(c) In the plan view drawing below, provide reference ties to at least 4 witness monuments, or, if the location is within a municipality, to at least 2 witness monuments. (Witness monuments shall be made of concrete, natural stone, iron or other equally durable material.) Describe witness monuments.

(d) 6" SUGAR

Show a plan view drawing depicting the relevant monuments and reference ties which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north.

> Set a 2"x 30" Aluminum monument with cap stamped for corner and accessories set to USIS standards.

38.35 7'STEEL POST 6" SUGAR IO" HEMLOCK EAST S85°W 32.02 21.70 9" CEDAR

Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (d), above. Show the distances between the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 2 of the witness monuments shown on the drawing in (d), above.

No descrepancy

Was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location?

Found perpetuated location

(g&h) Was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?
